Animal Plant and Health Inspection Service

TITLE: Export Health Certificate for Animal Products

OMB CONTROL NUMBER: 0579-0256

SUMMARY OF COLLECTION: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture board authority to detect, control, or eradicate pests or diseases of livestock or poultry. The export of agricultural commodities, including animals and animal products, is a major business in the United States and contributes to a favorable balance of trade. To facilitate the export of U.S. animals and products, the U.S. Department of Agriculture, Animal and Plant Health Inspection Service (APHIS), Veterinary Services maintains information regarding the import health requirements of other countries for animals and animal products exported from the United States. Many countries that import animal products from the United States require a certification from APHIS that the United States is free of certain diseases. These countries may also require that our certification statement contain additional declarations regarding the U.S. animal products being exported. Form VS-16-4 and VS-16-4A, Export Certificate for Animal Products and Export Certificate for Animal Products Continuation Sheet, a Hearing Request to appeal VS' decision to refuse to grant a certificate, and a Notification of Tampered Certificate can be used to meet these requirements. Regulations pertaining to export certification of animals and animal products are contained in 9 CFR parts 91.

NEED AND USE OF THE INFORMATION: Form VS 16-4 and VS 16-4A serves as the official certification that the United States is free of rinderpest, foot-and-mouth disease, classical swine fever, swine vesicular disease, African swine fever, bovine fever, bovine spongiform

encephalopathy, and contagious bovine pleuropneumonia. APHIS will collect the exporter's name, address, the name and address of the consignee, the quantity, and unit of measure, type of product being exported, the exporter's identification, and type of conveyance (ship, train, and truck) that will transport the products. The form also asks for any declarations the receiving country might require, such as statements concerning where the product originated and how it was processed. Without the information, many countries would not accept animal products from the United States, creating a serious trade imbalance and adversely affecting U.S. exporters.
